

April 6, 2020

With facilities in the US, United Kingdom, and Mexico, MTI is closely monitoring COVID-19 to help ensure the health and safety of our employees, customers, suppliers, and communities. Stay-at-Home / Safer-at-Home orders have been implemented in numerous locations, including where our MTI facilities and employees reside. Given that MTI is classified as an essential business (as a manufacturer for critical industries) in all our locations, please be aware that **all MTI facilities are open and will continue to remain open for manufacturing.**

All MTI facilities are taking proactive measures to slow the spread of the virus and will continue to be diligent on this front. Given the ever-changing dynamics associated with COVID-19, we will do our best to keep you informed regarding any impacts to MTI. Your patience, support, and partnership are truly appreciated in these unique times.

Stay Safe & Healthy!

David Ruppel
President
