

Custom-Designed Aircraft Motors - Lightweight & Reliable

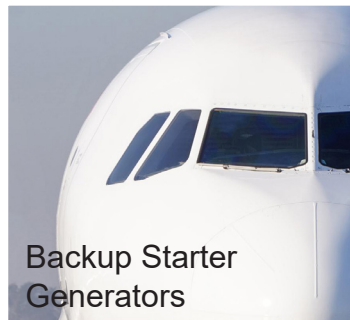

MTI Motion's product portfolio for the commercial aircraft industry is designed to deliver lightweight, reliable solutions with high power density.

Meets demanding environmental requirements:

- Compatible with Skydrol and various fuels
- Meets and exceeds commercial aircraft bonding requirements
- Housed and frameless motors
- Efficient, energy-dense electromagnetics
- Reliable, weight-conscious designs

Engineered for Reliability, Efficiency, & Risk Reduction

Since 1946, we've been manufacturing **customized motors, generators, and ball screws** for demanding environments and designed to your performance requirements, weight, and size restrictions. Our expertise in engineering and operational excellence allows us to provide reliable products to our partners all over the world.

Ball Screws

Generators

MTI Motion's product portfolio includes **custom ball screws** and **power generation** engineered to our standard of quality and designed to your specifications.
